GATE

FINGERPRINT MOUSE

EASIER SOLUTION & SIMPLE !!

Provide Complete Benefits For User

- **Remember Password**, Replace user set authentication with user fingerprint, so user no need to type username and password manually. For example using Social Media, e-banking, Private Email account, Windows Login, etc.
- **File / Folder Protection**, Provide 2 easy steps, to protect your file with High security encryption Method (Three Key Triple DES @168 bit)
- **Windows Log On**, Provide secure login, using your fingerprint instead of password typing.
- **Sharing File**, Sharing the protected file to the other user in the same machine.
- **360 Degrees Capture**, Easy and reliable to capture user fingerprint in any position.
- **User Friendly**, Easy to use and learn (guidance available in movie format).
- **Multi Languages**, Available in 16 international languages.
- **No Worry**, All data, file and profile store at user computer. So, if mouse lost, damaged or stolen, user data remain secure. Since no data store in mouse.
- **Emergency Policy Override Feature**, Activate this feature, user can access Windows, Remember password, Encryption & decryption file or setting the gatekey application by answering "secret answer".
