

MagicPass 1600

Product Introduction

MP1600 is an access control device produced by HIT Corporation, which is made from zinc alloy with elegant European design and professional surface treatment. This product adopts a lot of imported components, and strictly complies with the national security product standard. MP1600 experiences strict degradation test before leaving factory. The product has three buttons including enrollment, delete and door bell. The operation with audio prompt is very convenient for customer. Dustproof cover and non-LCD designs always keep the device clean. The USB-Client communications interface eliminates the trouble of wiring. Built-in ID reader module offers customers different methods of use. MP1600 is applicable for small office, house and same place with low-level security requirement

Features:

- Easy installation, safe and reliable.
- Extreme Durability with Metallic Housing
- Anti-dust cover protects fingerprint sensor from ash, keeping clean.
- Simple and convenient operation method with full audio prompt.
- Supporting ID/Mifare/HID proximity card

Specification:

MP1600

- Fingerprint Capacity: 200
- Card Capacity: 100
- Logs Capacity: 30,000
- Fingerprint sensor : Optical sensor
- Algorithm version : Finger VX9.0
- Communication: RS232/485, USB client
- Access control : door sensor, alarm, lock, exit button, wired door bell

Wiegand output 26bit

ID card is standard function

- Optional functions: Mifare/HID card
- Keypad: Register, delete, bell
- Power supply: DC12V
- Identification time : $\leq 2S$
- FAR: $\leq 0.0001\%$
- FRR: $\leq 0.01\%$
- LED: Red, Green, Blue
- Operating Temperature : $0^{\circ}C-45^{\circ}C$
- Operating Humidity : 20%-80%
- Size: 120*120*35.1mm (W*H*D)
